PROFESSIONAL SUMMARY

Recent B.Sc. Computer Science (AI & Data Science) graduate with hands-on experience in Python, SQL, Pandas, data analysis, and data visualization. Skilled in transforming raw data into actionable business insights through data cleaning, exploratory data analysis (EDA), KPI development, trend analysis, and interactive dashboards using Power BI and Tableau. Strong analytical and problem-solving abilities with a keen interest in applying data-driven insights to business strategy, customer analytics, and growth opportunities. Seeking a Data Analyst role to contribute to data-driven decision-making and develop scalable analytical solutions in a collaborative, fast-paced environment.

INTERNSHIP EXPERIENCE

Full Stack Web Developer Intern

Accent Techno Soft

- Built responsive web applications using HTML, CSS, PHP, and MySQL as part of an Agile development team, optimizing code and database queries to improve page load speed by 20%
- Collaborated with team members using Git for version control and participated in daily stand-up meetings to ensure timely delivery of project milestones
- Resolved 3-5 critical bugs across multiple modules, strengthening application stability and reliability through systematic debugging and testing

EDUCATION

B.Sc. Computer Science (Artificial Intelligence & Data Science)

2026

Sri Ramakrishna College of Arts and Science, Coimbatore

CERTIFICATIONS

- Data Analytics Job Simulation — Deloitte Australia (Forage), Mar 2025
- Value-Added Course in Power BI — Sri Ramakrishna College of Arts and Science, 2025-2026

SKILLS

- Programming: Python (NumPy, Pandas, Matplotlib, Seaborn), SQL
- BI & Analytics Tools: Power BI, Tableau, Microsoft Excel (Pivot Tables, VLOOKUP/XLOOKUP, Data Cleaning)
- Web Technologies: HTML, CSS, PHP, MySQL
- Core Concepts: Exploratory Data Analysis, Data Visualization, Dashboard Development, NLP
- Soft Skills: Leadership, Communication, Problem Solving, Strategic Thinking, Teamwork

PROJECTS

Sales Analytics Dashboard

Personal Project | [GitHub](#)

- Cleaned and analyzed 9,994 sales records spanning 4 years (2014-2017) across 3 product categories, 17 subcategories, 4 regions, and 3 customer segments using Python (Pandas), SQL, and Excel to extract actionable business insights
- Designed and built an interactive Power BI KPI dashboard tracking \$725.46K in regional sales and \$145.45K in category profit, enabling drill-down analysis across 5,009 orders, 1,862 unique products, and 793 customers

Railway Business Analytics Dashboard — Power BI

Personal Project | [GitHub](#)

- Developed an interactive two-page Power BI dashboard to analyze railway passenger, booking, revenue, occupancy, capacity, and delay performance
- Created DAX measures and KPIs including Total Revenue, Total Bookings, Average Occupancy, Train Capacity, Average Journey Distance, and Average Delay
- Built business-focused visualizations for revenue by train type and route, booking status, railway-zone delays, train capacity, and monthly delay trends
- Implemented interactive Route, Month, and Partner Platform filters

Grocery Sales Analysis — Python, Pandas, Matplotlib, Seaborn

Personal Project | [GitHub](#)

- Analyzed grocery sales data to identify revenue patterns across cities, product categories, and payment methods
- Performed data cleaning by handling missing values, duplicate records, and column transformations using Pandas
- Created a revenue feature and used filtering, sorting, merging, grouping, and aggregation to derive business insights
- Developed bar charts, line charts, histograms, boxplots, and correlation heatmaps to visualize sales trends and distributions
- Identified high-performing areas and categories and provided data-driven recommendations for inventory and promotional planning
